An alternative to tiles, stainless steel and granite, Colour Glass eliminates the inconvenience of grouting, is easy to clean and creates a sleek, modern look.

One of the most important design elements is colour, and that is something that has been lacking in the Irish glass industry. Now a product called Colour Glass has been made available in Ireland which is changing all of that!

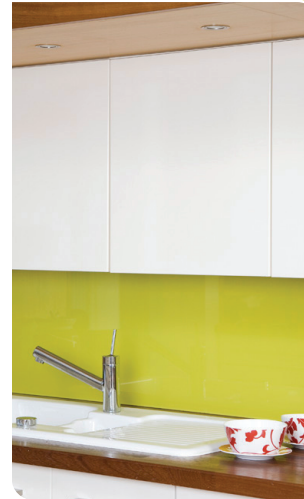

### What is Colour Glass?

For decades, glass manufacturers have been trying to devise a process which would result in the permanent fixing of colour to glass. Now, thanks to an innovative new process developed by GlassKote in Australia, this has been made possible. Using GlassKote's revolutionary new treatment, Colour Glass allows you to decorate your home in style through the use of specially treated glass which is available in practically any colour under the sun.

### What are the benefits of using Colour Glass?

An alternative to tiles, stainless steel and granite, Colour Glass eliminates the inconvenience of grouting, is easy to clean and creates a sleek, modern look. All Colour Glass is toughened for use in kitchens and therefore is highly resistant to impact and heat. The real benefits of Colour Glass are the unlimited palette of colours available and the numerous creative ways in which you can use Colour Glass to really enhance the overall look of your home. Colour Glass is cost-effective, easy to clean and highly durable.

Colour Glass is also ideal for creating highly polished, sleek looking glass worktops, tabletops and table wear.

### How can Colour Glass be used?

Colour Glass can be used to add a splash of colour to the interior of your home in the form of kitchen splash-backs, feature wall trimmings or as an alternative to bathroom tiles. Colour Glass is also ideal for creating highly polished, sleek looking glass worktops, tabletops and table wear.

The Colour Glass design team will help you to create a bespoke glass piece for your kitchen splash-back, glass furniture, bathroom, even commercial interiors and exteriors. Our design team can help you to create wonderful effects that can't be achieved through the use of any other material. Colour Glass can also be used to enhance the design quality of external architectural features of buildings such as the use of Colour Glass panels in exterior walls.

### The Colour Glass Guarantee

You will enjoy the benefits of our professional service based on the delivery of a guaranteed, quality product within 21 days. The durability and colourfastness of Colour Glass is supported by a ten year guarantee. We are ISO 9002 approved, the highest quality assurance available to suppliers in the glass industry.

Colour Glass has been tested for its colourfastness and durability in a multitude of commercial and residential building applications. The GlassKote process is tried and tested with installations dating back more than 25 years. The product is now available in over 22 countries worldwide, and is finally being made available in Ireland.
